## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 5, 7, 15-16 and 18 remain rejected under 35 U.S.C. 102(b) as being anticipated by EP 0369292 A1 to Rothgang et al.

Amended claim language fails to differentiate the prior art composition from the claimed composition because the recitations added by amendment are drawn to the intended use of the composition. The composition of Rothgang contains a fine powdered urea prior to the addition of the water, and as a result, discloses the claimed invention. Applicant appears to be arguing limitations that are not present in the claims in that the claims are couched in open language that allows inclusion of buffers.

3. Claims 1, 7-10, and 13-14 are rejected under 35 U.S.C. 102(b) as being anticipated by either of U.S. Patent 4,585,623 to Chandler or U.S. Patent 4,690,801 to Anderson.

Amended claim language fails to differentiate the prior art composition from the claimed composition because the recitations added by amendment are drawn to the intended use of the composition. The composition of the cited patents contains a fine powdered urea prior to the addition of the water, and as a result, discloses the claimed

invention. Applicants' argument regarding the claim limitation of particle size is moot since the rejection against these claims have been withdrawn.

### ***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claim 12 remain rejected under 35 U.S.C. 103(a) as being unpatentable over either of U.S. Patent 4,585,623 to Chandler or U.S. Patent 4,690,801 to Anderson in view of Rothgang et al.

Applicants' arguments are directed to the independent claims. These arguments have been addressed above.

### ***Double Patenting***

6. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Art Unit: 1651

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

7. Claims 15-18 remain provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 26 and 28-29 of copending Application No. 09/977874. Although the conflicting claims are not identical, they are not patentably distinct from each other because the definitions of the terms "powdered urea" as defined in claim 16 and 17-18 meet the limitations of claim 26 and claims 28-29.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

8. Claims 1-18 remain provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-22 of copending Application No. 09/977555. Although the conflicting claims are not identical, they are not patentably distinct from each other because the system recited in the referenced claims is the same system as claimed.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Applicants' intention to file a terminal disclaimer is acknowledged; however, this rejection cannot be held in abeyance and remains on the record until the terminal disclaimer is filed.

***Conclusion***

9. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

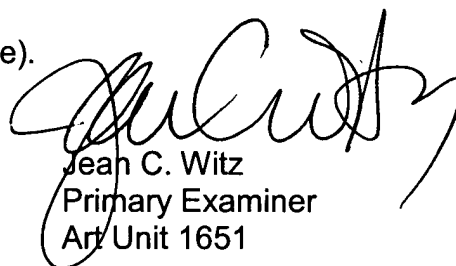

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
